INSTRUCTIONS AND GUARANTEE CARD
CALIBRE 1887 CHRONOGRAPH

INTRODUCTION

Congratulations on your purchase of a TAG Heuer watch. You have made an excellent choice in selecting the ultimate in technical innovation, precision and endurance – high-performance sports criteria that have been hallmarks of TAG Heuer's commitment to its craft since 1860. With its long dedication to measuring time, this Swiss watchmaking firm has a number of technical patents to its name.

It is through this dedication that TAG Heuer has become the Official Timekeeper for a number of major sporting events and has achieved recognition as a world leader in the field of prestige sports watches.

Each TAG Heuer timepiece is built to meet the most exacting requirements. The materials used in our watches make them exceptionally resilient, even when used under the most rigorous conditions, and very careful attention is paid to detail. Before a new TAG Heuer product is launched it is put through more than 60 precision and quality tests.

With its modern, innovative design, your new TAG Heuer watch combines tradition with technical achievement. We hope it will bring you complete satisfaction.

LIMITED INTERNATIONAL WARRANTY

Your TAG Heuer has been manufactured in the authentic tradition of Swiss watchmaking and has been individually tested to ensure that it is water-resistant and functions perfectly. Nevertheless, it is covered by a limited international guarantee against any manufacturing defect for a period of two years from the date of purchase, under the conditions below.

What is covered ?

Under this limited two-year guarantee, TAG Heuer undertakes to repair, free of charge, any problem with the functions of the watch that result from defective manufacturing. This guarantee is only honored in official TAG Heuer Customer Service Centers that are present in more than 100 countries. In addition, certain limiting conditions do apply and for this reason it is essential that you read the following paragraphs.

What are the limiting conditions of this guarantee ?

To benefit from this limited guarantee the following conditions must be met:

- the international guarantee card, located in the guarantee booklet you received with your watch, must be enclosed with the watch when it is sent for repair and must be signed and dated at the time of purchase by an authorized TAG Heuer dealer; TAG Heuer will not honor the guarantee for

watches sold without a valid guarantee card properly filled out and signed by an authorized TAG Heuer dealer or by a dedicated TAG Heuer boutique;

- the serial number engraved on the case is perfectly legible and no part of the original case back or original serial number has been removed, modified, falsified, altered, replaced, erased, defaced or made illegible.

Failure to abide by any of the above conditions renders all rights resulting from the TAG Heuer international guarantee null and void.

What is not covered ?

Damage resulting from service provided anywhere other than at an official TAG Heuer Customer Service Center is not covered and shall void the guarantee. The limited guarantee also does not cover bracelets, crystals and batteries, or any damage to the case or movement due to moisture that might have entered the watch as a result of improper handling. More generally, it does not apply if there has been improper or inadequate use of the watch.

General conditions and limitations:

This limited guarantee replaces any guarantees implied by some countries' local law, including the implied guarantee of merchantability, which are disclaimed. Some countries' local law may not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This guarantee gives you specific legal rights and you may also have other rights under local laws which vary from country to country. TAG Heuer and its official Customer Service Centers shall have sole discretion to decide to repair or replace any TAG Heuer timepiece under this limited international guarantee.

We recommend that you send your watch by registered mail, carefully wrapped to avoid damage, to the nearest official TAG Heuer Customer Service Center, or take it to your authorized TAG Heuer dealer or dedicated TAG Heuer boutique. TAG Heuer is not responsible for loss or damage during shipping. The list of official TAG Heuer Customer Service Centers can be found at the end of this booklet. On request, these official TAG Heuer Customer Service Centers will provide you with the details of your nearest authorized TAG Heuer dealer or dedicated TAG Heuer boutique. This guarantee does not affect your legal rights as a consumer. Please check that this booklet contains an international guarantee card – otherwise you will not be covered by the limited guarantee services outlined above.

TAG Heuer will provide spare parts within a period of 10 years from the date of purchase.

In this booklet you will find a number of recommendations for the use and maintenance of your TAG Heuer watch. Please follow them carefully since the guarantee will become invalid in the event of

inappropriate use or handling. In particular, you should ensure that, after setting the day, date and time, the crown is pushed into position 1*/ fully screwed into position 0* to ensure the water-resistance of the watch.

Recommendations and limited guarantee specific to the Australian and New Zealand markets

TAG Heuer goods come with guarantees that cannot be excluded under the Australian Consumer Law: the customer is entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage, and the customer is also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

YOUR TAG HEUER

The movement

Your chronograph is equipped with the TAG Heuer Calibre 1887 a self-winding automatic movement. Each movement of your wrist activates the rotor which winds the spring and keeps your watch functioning. Completely wound up, your watch will continue to function for approx. 50 hours.

Technical specifications

Your TAG Heuer chronograph incorporates the technical features of an authentic sports watch:

- water-resistance to 100 meters
- luminescent hands
- leather strap or steel bracelet with folding buckle and security push buttons
- scratch-resistant sapphire crystal.

CARING FOR YOUR TAG HEUER

Your TAG Heuer requires a certain amount of care. The following guidelines will enable you to ensure its reliability and protect its appearance over time.

Cleaning

Please regularly rinse your watch in fresh water and soap, especially whenever you have used it in salt water. For frequent or prolonged use in water, we recommend you opt for a steel and/or gold bracelet

Condensation

If the temperature changes suddenly, a slight condensation may appear under the crystal of your watch. This mist will disappear by itself and will not affect the functioning of the watch. If the condensation persists, please see your official TAG Heuer dealer.

Pressure seals

Over time, the pressure seals on your watch may deteriorate. We recommend that you have the water-resistance of your watch checked once a year by your TAG Heuer dealer, who will replace the seals if necessary.

Crystals

The crystal in some of our watches is coated with a single or double anti-reflective treatment* to improve readability. Wear and tear may cause marks to appear. These are considered normal and are therefore not covered by the warranty. In normal conditions of use, the coating will be completely satisfactory.

Automatic movement

When a self-winding mechanical watch has not been worn for some time, it uses up its power reserve and stops. To start it again, either place the crown in position 1 and rewind it manually, or activate the rotor by making movements of your wrist. The automatic movement requires particular care. To maintain its precision, TAG Heuer Service Centers recommend a service every 4 to 6 years. This period can vary according to the conditions in which your watch is used.

Gold plating

Some of our watches have components on which a thin layer of gold has been deposited by galvanic electroplating. Sensitive to friction on hard, rough surfaces, this thin layer of gold can wear out over time. Under normal conditions of use, the plating on your TAG Heuer watch will fully satisfy your requirements.

Solid gold

Some of our watches are made from 18 carat solid gold.

Titanium carbide coating

Some of our watches have components on which a thin layer of titanium carbide has been deposited by spraying. Sensitive to friction on hard, rough surfaces, this thin layer of titanium carbide can wear out over time. The international warranty does not cover the alteration of this thin layer by an impact or mishandling. Under normal conditions of use, the coating on your TAG Heuer watch will fully satisfy your requirements.

Bracelets/Leather straps

Our straps are made of the finest leather, treated for superior resistance to humidity. The crocodile leather comes exclusively from farmed animals, and its origin is certified by customs documents.

This leather is a natural material. However, we recommend that you limit its use in water. To maintain the condition of your leather strap, we recommend cleaning it with a soft, dry cotton cloth and not using any abrasive products. It is normal for the leather to become slightly darker over time. For your comfort, wash a rubber strap regularly with soap and water, particularly on the inner surface.

For the upkeep of your metal bracelet, we recommend cleaning it with soap and water once a month. To avoid any accidental opening, our steel and/or gold bracelets are fitted with a double security or button clasp.

DISPLAY

Watch functions

- ① hour
- ② minute
- ③ second
- ④ date

Chronograph functions

- ⑤ second counter
- ⑥ 30-minute counter
- ⑦ 12-hour counter
- A start/stop button
- B zero reset button

SETTING THE TIME AND DATE

Position 1: Normal position and manual winding

This position allows you to wind your watch manually by turning the crown clockwise. Pull the crown out to position 2.

Position 2: Rapid date correction

Turn the crown clockwise until the desired date is displayed. Pull the crown out to position 3.

Warning: do not change the date between 8 p.m. and 2 a.m. Attempting to use the rapid date correction during this period could damage the calendar mechanism.

Position 3: Time correction

Adjust the time by turning the crown in the desired direction.

Important: after any adjustment, push the crown back into position 1 in order to keep your watch water-resistant.

SINGLE TIMING

Caution: Before each timing, the hands must be at zero. If necessary, press button **B**.

1. Start: button **A** (START)
 2. Stop: button **A** (STOP)
- > **Time read-out**
3. Reset to zero: button **B**

CUMULATIVE TIMING

This function measures several consecutive times, adding them to give the total measured time.

Caution: Before each timing, the hands must be at zero. If necessary, press button **B**.

1. Start 1st time: button **A** (START)
 2. Stop 1st time: button **A** (STOP)
- > **Read 1st time**
3. Start 2nd time: button **A** (START)
 4. Stop 2nd time: button **A** (STOP)
- > **Read 1st and 2nd times, etc.**
5. Reset to zero: button **B**

USING THE TACHYMETER SCALE*

The tachymeter enables you to measure your average speed over a distance of 1 km or 1 mile (for speeds in excess of 60 km/h or 60 mph).

Start the chronograph at the beginning of a 1 kilometer or 1 mile distance and stop it when this distance has been covered. The seconds hand indicates a number on the tachymeter scale. This is your average speed in km/h or mph.
